

Bird ID Guide

Materials:

- Construction paper
- Color pencils/ crayons
- Computer/ book
- Ruler
- Scissors
- Binoculars (Only if you want to go outside with your parent to see what birds are in your backyard)

Objective:

Explorers will attempt to create a Bird ID Guide that is relevant to their local area

Lesson:

The goal is to create a bird guide that your children can reference in the future for different birds in your area!

Make sure they research the following:

- Research at least 8 bird species that can be found in your local area
- If you have binoculars, with your parent's supervision, go into the backyard and try to see the different species that live near you
- Print/ draw a picture of them that shows the different characteristics of each species
- What is their natural habitat?
- Preferred choice of food
- One fun fact
- Anything else you find interesting about each bird
