

Preserve Nature (Collage)

Materials:

- Construction Paper
- Glue
- Dead leaves, grass, flowers, etc.

Objective:

To have kids appreciate what's right in their own backyards.

Lesson:

- Take your kids into the backyard to find dead leaves, grass, flowers, etc.
- Have them pickup at least ten different items for their collage. (If they find other items they want to add onto the collage, that would be fine as well. Double check that nothing is alive and/or empty when brought back inside.)
- Once complete, give them the construction paper and glue.
- They can start gluing their items to the paper.
- When complete, leave collages to dry.
